

8 or 12 x 0.3 Watt medium power LEDs with white reflector per module

Modular, 3D flexible LED linear lighting system

Product description:

For use in interior indirect cove lighting applications where the building surfaces are non linear with curved profiles

Each module - 8 or 12 x 0.3 Watt Osram, Samsung or Luminus LEDs

Up to 3.5 Watts per 4" (100mm) module

24V DC supply for 8 LED/module version. 30V DC supply for 12 LED/module version

High efficiency white reflector

Flexible in 3 dimensions - Articulated ball-joint system between modules

LED pitch is maintained between the modules

Side, back and end power feed and connector options allow for continuous lighting with no dark areas between fixtures. 16 Amp IP20 connectors join fixtures together on-site

Integral LV constant current driver

Dimming options available: 1-10V, DMX and DALI. Separate dimming channel

Various LED colour temperature and CRI options available

Satin black, satin white or any RAL paint colour finish

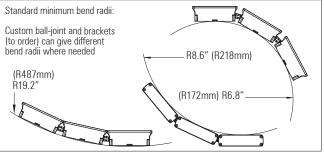

Custom lengths based on a 4" (100mm) module length up to 8.3' (2.5 mtrs)

Various mounting options and bracket types are available

3D LED Flex 25 IP20 Class 2

8 or 12 x 0.3 Watt medium power LEDs with white reflector per module Modular, 3D flexible LED linear lighting system

Nominal 4" (100mm) Custom lengths up to 8.3' (25mm) (2.5 Mtrs) based on a nominal 4" (100mm) module length module length 1' (100mm) module length 33mm) **F** ര mm 0 Π Π

Up to 1,200 lumens per ft

(Up to 4,000 Lumens per Mtr)

Adjustable angle mounting bracketry for 3D LED Flex 25 IP20 8 or 12 \times 0.3 Watt medium power LEDs with white reflector per module

The 3D LED Flex 25 system is flexible in 3 dimensions, which allows it to follow curved building contours. Once they have been fixed to the building surface, adjustable angle brackets allow the modules to be rotated around the major axis, so that the light output can be aimed precisely.

The angle of the modules can be adjusted by hand on-site. The friction ball-joint system keeps the modules correctly positioned.

A standard height version and a custom height version are available.

Custom options are also available.

The standard height bracket is made from polycarbonate and is available in black or white.

The custom-height bracket is made from aluminium with a powder coat finish which is available in satin black, satin white or any RAL paint colour finish.

3D LED FLEX 25 anti-glare accessories

For use with the 3D LED Flex 25 system IP20 to control light glare from the LEDs when the fixtures are not fully recessed

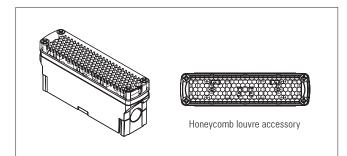

3 blade, 1 blade and no blade snoots are available

Satin black, satin white or any RAL paint colour finish

Custom height to order. Straight or any custom cut angle side-profile to order

The honeycomb louvre accessory provides excellent glare control with a low profile

3D LED Flex 25 System Class 2

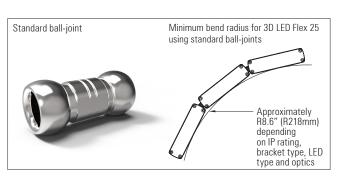

Ball-joint types

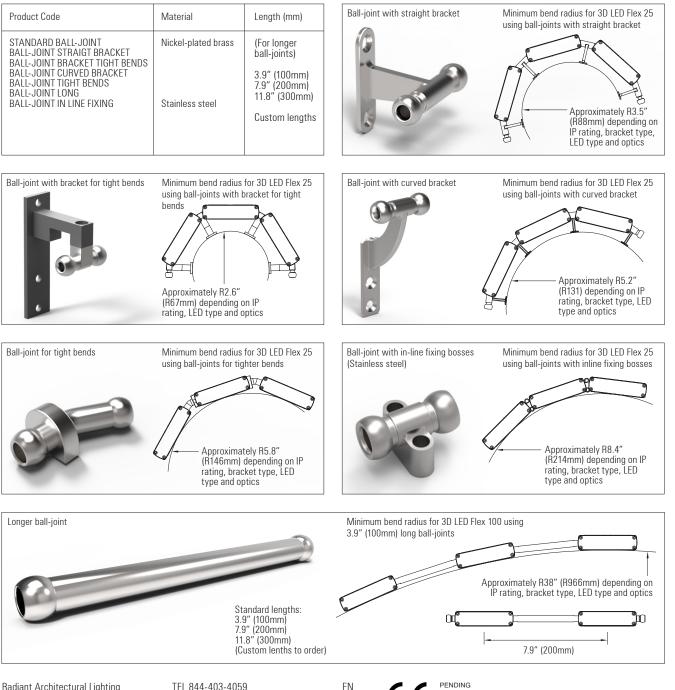

Product description:

Radiant's 3D LED Flex 25 system comprises a patented articulated ball-joint system which links the heatsink modules.

The ball-joints system allows the strips to bend and twist in 3 dimensions, so that they can follow any building contours, whilst maintaining a constant LED pitch.

There are various types of ball-joint to suit different applications, some of which can be seen on this data sheet. Please contact Radiant to discuss custom solutions.
