F Grazer IP20
LED linear lighting system with high-power LEDs with narrow elliptical beam lenses

Damien McKay of Light 360 in Belfast specified a variety of Radiant linear systems, including the F Grazer, for the 5 star Amara Hotel in Cyprus.

The system was specified to graze the stone-clad wall surfaces in the hotel's Michelin starred Ristorante Locatelli with a warm wash of light.

The Radiant F Grazer was fitted with narrow elliptical beam lenses and anti-glare snoots.

The F Grazer system was developed for use in a wide variety of hospitality lighting projects, to produce surface grazing effects where a minimal and cost-effective solution is required.

Radiant's 3D LED Flex 40 IP20 system, with high power LEDs and narrow elliptical beam lenses, was used to provide a light graze effect down the columns on the interior of the hotel.

The system's innovative design incorporates friction ball-joints between the heatsink modules, making it flexible in 3 dimensions and easily hand-bendable on-site. Adjustable angle brackets allow for the modules to be aimed precisely, to graze the light perfectly down the columns.

Anti-glare snoot accessories ensure excellent visual comfort.
